

INDEPENDENCE DAY RESONATES WITH LOCAL INDEPENDENT ELEVATOR CORPORATION

PATERSON, N.J. – While many New Jerseyans look forward to barbeques and backyards this Fourth of July, the anniversary of our Nation's independence reminds Liberty Elevator Corporation of its historic contribution to Lady Liberty's restoration.

July 4, 1986 marked the completion of the Statue of Liberty's renovation. Liberty Elevator, then National Elevator, played an integral role in the project. After bidding against international competitors, the local Paterson company was awarded the prestigious honor of designing and installing a state of the art vertical transportation system.

The construction was required to remain within the pre-existing structure of the National landmark. This unique specification allowed Liberty to showcase its skills in terms of engineering, creativity, and customization. Liberty ultimately constructed the largest hydraulic double-decker in the United States that provides a 360-degree interior view of the base of the statue. A local company's notable involvement has since assisted millions of international visitors.

2010 marks Liberty Elevator Corporation's fiftieth anniversary as a privately owned and operated family business. Liberty is a full service elevator company specializing in customizable preventative maintenance programs, modernizations, cab refurbishments and new installations. For more information on what Liberty can do for you, call 1-800-522-4551.
